DANCING CLASSES

According to our philosophy, feeling and enjoying the rhythm of the music is the most important part of learning Latin dances - if you feel and enjoy the music you will always have an enjoyable time dancing and your spirit will spread the charm to other people. Complex figures and movements might add more fun and dynamism to your dance but without the feeling of the rhythm they are of little use and would only prevent you from getting fully into it and it would then be a very mechanized dance.
